

TOWN OF ROMULUS

Special Use Permit Application

Please Print All Information. Submit the completed form and the appropriate fees (if any) to:

Town Secretary, Town of Romulus, P.O. Box 177, Willard, NY 14588

Fees are non-refundable. Payment may be made by personal check or money order payable to "Town of Romulus" and must accompany application.

Please follow these guidelines:

- Ensure that your proposed plan is an allowable use (refer to the Town of Romulus Zoning Code and consult with the Code Enforcement Officer)
- Complete and include the New York State Environmental Quality Review (SEQR) form
- Complete and include the Agricultural Data Statement form (if applicable)
- Provide maps as required in Article IX of the Town of Romulus Zoning Code
- Provide seven (7) copies of all documents

Please submit your application at least three (3) weeks prior to the next scheduled Town of Romulus Planning Board meeting. Check the Town website at www.romulustown.com for dates, times, and further information. Incomplete applications cannot be considered by the Planning Board.

TOWN OF ROMULUS

Special Use Permit Application

ADDENDUM A to Application for Special Use Permit

The Planning Board, in its discretion, may require the applicant to submit additional maps and materials in conjunction with the Special Permit application and site plan. Such maps or materials may include the following:

1. Vicinity map – this map at a scale of not less than 1" = 2,000' (1 inch equals 2,000 feet) shall show the relationship off the proposed to existing community facilities that may affect or serve it such as roads, shopping areas, school, and employment centers. It shall show all properties, subdivisions, roads, and easements within three-hundred feet (300') of the proposal.
2. Topographic map – this shall be drawn at a scale of not less than 1" = 100' (1 inch equals 100 feet) and shall show existing topography at contour levels of not more than ten (10) feet. This map shall also show the location of pertinent natural features that may influence the design of the proposed use, such as lakes, ponds, streams, wetlands, rock outcrops, wooded areas, and areas subject to flooding. If the Planning Board finds that a topographic map at the above-mentioned scale provides insufficient detail to adequately review and evaluate the potential impact of the proposed use, the Planning Board may require the submission of a topographic map at a scale which it deems adequate to perform such review and evaluation.
3. Development Plan – this map of the site of the proposed Special Use shall be drawn at a scale of not less than 1" = 100' (1 inch equals 100 feet) and shall show the location of all buildings and structures; all automobile parking and all parking for commercial vehicles while loading and unloading; the location and width of all driveways, exits and entrances; the location of all existing or proposed site improvements including drains, culverts, retaining walls and fences; a narrative description of, and indication on the site plan of the location of sewage disposal facilities and water facilities; the location and size of all existing and proposed signs; the location of proposed buffer areas and the design of lighting and other facilities.
4. Elevations and/or Section – if deemed necessary by the Planning Board, the site plan shall be accompanied by elevations and/or sections at the same or greater scale as is required for the site plan. Such drawing shall be of sufficient details to clearly delineate the bulk, height, and style of all buildings and other permanent structures included in the proposal.
5. Engineering plans – if deemed necessary by the Planning Board, the site plan shall be accompanied by engineering plans including road improvements, drainage systems, and public or private utility systems and other such supporting data.
